

Online Registration

There are several options for families to join your unit by registering online. You can direct them to BeAScout where they can find your unit and apply (make sure your unit pin settings are set to accept online applications and information is current). One of the unit Key 3 can send an invitation to the family in a my.Scouting. The unit can email the QR code or the URL link to the family to access the unit's online registration. Families should be prepared to pay the registration fee when they submit the online application. Youth applications can be approved by the Cubmaster/Scoutmaster, Committee Chair or Charter Organization Representative. All three should receive an email when an online application has been submitted. Adult applications will need to be approved by the Chartered Organization Representative. The COR will receive an email when an adult application has been submitted. Please approve applications within 48 hours.

BeAScout:

The family goes to BeAScout.org and chooses the type of unit they are looking for and enters the zip code of the area they are looking for. They click on the unit and can then click on the tab for more information or to apply online.

Send An Invitation:

One of the unit Key 3 can log in to their my.Scouting account and click on Invitation Manager. Click on the box that says New Lead. Complete the information in the box that opens up and click on Send Application. Invitation Manager is also where you will receive information from anyone asking for more information from the BeAScout site. This will show in the Status Summary under New.

Email QR Code or URL Link:

Both the code and the link can be found in Invitation Manager. You can either download the QR code by clicking on the tab or right click on the code and copy and paste it in your email to the family. To send the URL link, click on the Copy URL tab and paste it in your email to the family.

The parent/guardian registering a youth or the adult completing their own application will be asked to create a my.Scouting account when they start the application process. If they already have an account, they use that account and not create a new one. The system should then walk them through the online registration including submitting the payment for registration fees. If there are any issues, they should contact the Sioux Council office.
